Sealing with foam rubber tape 10mm Circular against flush-mounted or surface-mounted box other panel cut-out

- IP-Video Camera
- Speaker
- Illuminated LCD-Display 4 lines x 20 characters
- Call Button
- Select Buttons
- Microphone
- iButton-Reader

High-quality front panel made of aluminium, solid, gross-polished surface, anodized.
4 screws for the mounting of the video intercom are included in the delivery of the flush-mounted box.

Cable outlet at the bottom!

Installation Instructions:

Rear side of the bearing surface is to be set at least flush with the final plastering. (Mounting on existing plastered surfaces is possible). The 1.0 mm thick sheet metal will be covered by the mounting frame (FB). The frame can alternatively also be flush-plastered with the front of the sheet metal.

Sealing by outdoor installation:
Around and on the back, the front edge of the sheet metal is to be sealed with acrylic against the plaster surface. The acrylic sealing must be applied that no moisture can get in between the flush-mounted box and the wall into the mounting space. Additionally, the acrylic must be smoothed in a way that the foamed rubber seal of the mounting frame (FB) is resting on an even surface and no moisture can get in between the foamed rubber seal and the flush-mounted box through hollow spaces.

Drilling template for wall finishing
- For chiselling: 45 mm depth
- For cavity wall installation: wall thicknesses from 6 to 25 mm possible with optional cavity wall mounting kit 33-1503

Cavity wall mounting kit
Consists of 4 sets to brace the flush-mounted box from the back against a plaster board or a front panel.
Delivery is optional upon request.

For wall installation is recommended that the flush-mounted box is bolted together with the underlying wall construction through open holes in the rear panel.

All breakouts for cable entry are closed and designed as predetermined breaking points.
To open the breaking point, a flat screwdriver is applied at the rim and the breakthrough is made by a hammer stroke.
Two cable entries 16.5 mm and 26 mm respectively at the bottom and the back.
