Loxone Basecamp is built in Austria

# 2016

**Opened Smart Showhome**  
Offering live-in trials of a Real Smart Home.

# 2018

**New Loxone branch opens in Germany**

# Our vision: Change the way we live in our own homes.

Our company focus today still focuses on our founding idea of creating a home that just knows what to do.

“We wanted a solution that was highly intelligent, simple to use and yet affordable! We wanted to have a system where the lights would turn on if you got up in the middle of the night without having to fumble around for a light switch in the dark; a system intelligent enough to close the blinds and curtains automatically based on the position of the sun and a system that maintains the perfect temperature in every room.”

**Martin Öller**  
CEO & Co-Founder

**Save  
50,000  
tasks.  
Enjoy more  
time for life.**

# More time for my family and me.

"My Loxone Smart Home takes care of so many tasks every day without me even having to think about it. I now have time for the important things in life!"

**Tina, 27**  
Smart Home Owner

# A home like no other

A Loxone Smart Home thinks the way you do. It understands which lights to turn on, which music to play and your preferred room temperature for different times of the day – whether it be in the morning or evening, or specifically when you're cooking, relaxing or having guests over. This level of comfort can only be experienced in a Loxone Smart Home.

# Intuitive control

Your home takes care of thousands of tasks for you, without you having to lift a finger. Of course, should you ever want to change something, a simple tap on a Loxone Touch is enough.

# Protecting the occupants

## Watching out for the whole family

Your home is always looking out for you. Whilst you're asleep, it keeps watch, alerts you to any intruders and sounds the alarm in an emergency. It can warn you about dangers such as fire or water leaks and light a path to safety. Your Loxone Smart Home gives you peace of mind, around the clock.

# Privacy protection

## Your smart home, your data

**Other  
Solutions**

**Loxone  
Smart Homes**

# Intelligent energy management

A Loxone Smart Home manages energy automatically. It makes the most of the electricity it produced and can help you to save energy. During the daytime, you can use your self-produced electricity to run appliances without paying a penny. When not in use, devices on standby can automatically be switched off to reduce power consumption.

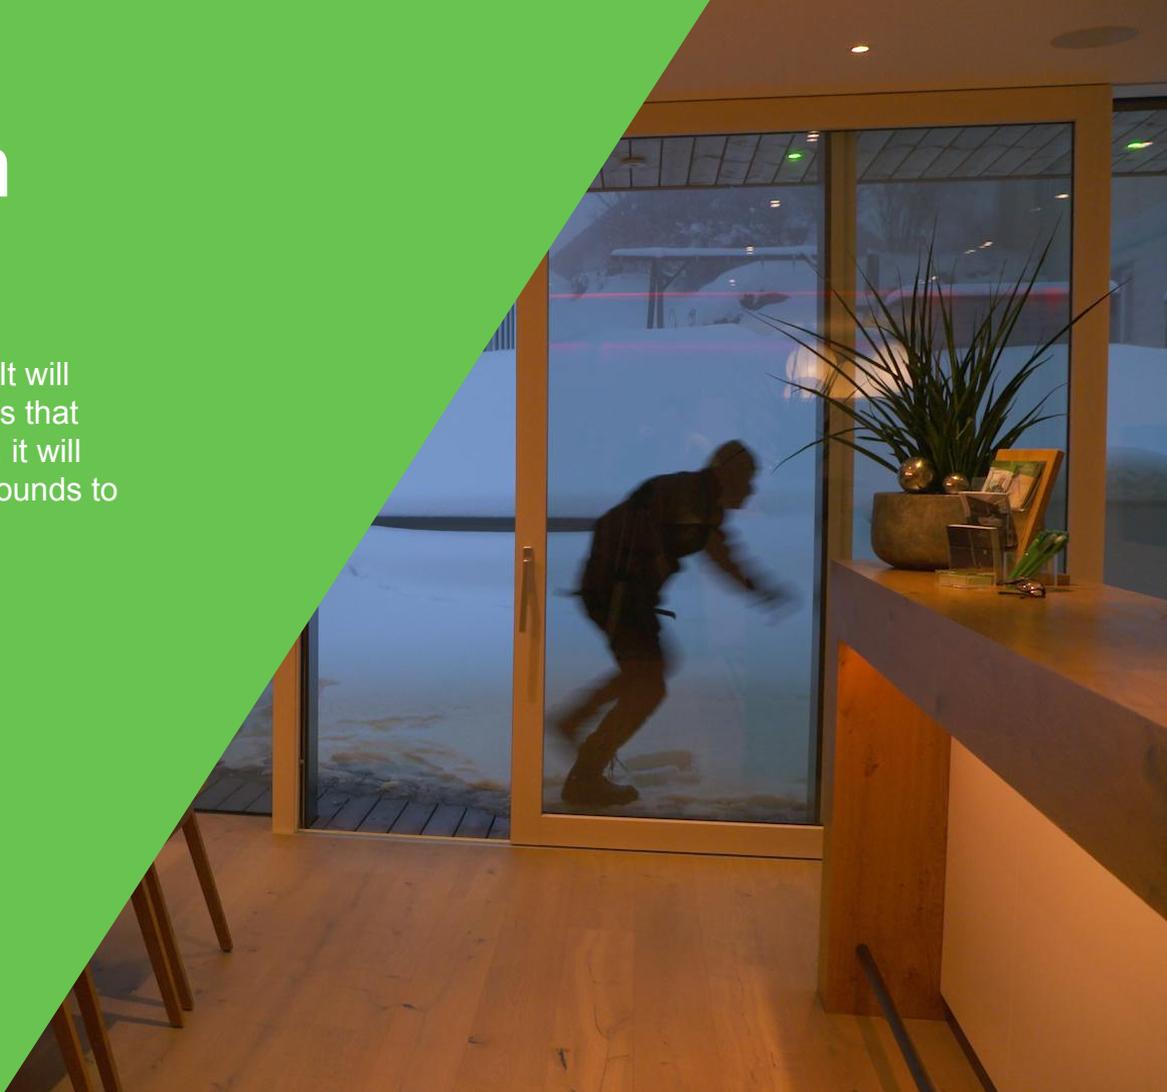

# Protecting the building

Life happens when you least expect it. For those unexpected events, your home will keep watch over itself and alert you of any potential trouble. For example, it can detect a water leak, register open windows and doors, protect itself from potential damage caused by rain, frost or strong winds, and much more.

# Protection again burglary

See your home as having an invisible shield. It will protect itself from uninvited guests. If it detects that someone trying to gain access who shouldn't, it will react with flashing lights and loud, alarming sounds to deter the potential burglar.
