

New community by Evergreene Homes offers Loxone as a standard

The Arbors of McLean by Evergreene Homes offers Loxone lighting control in kitchens as a standard to each new home with optional upgrade to master suite, bath and closet.

June 22, 2020 – Just minutes from the nation’s capital, a [new community is coming together built by Evergreene Homes and Loxone](#), offering both industry-leading luxury homes and building automation. ‘*Building a home in the comfort and style of your life*’ is the mission of Evergreene Homes and Loxone in the creation of The Arbors of McLean community. Together, this partnership creates a new standard for living with an automated environment that’s energy efficient and improves comfort in the home.

“At Loxone, we’re growing rapidly,” states Mark Skazenski, Vice President at Loxone US, “and we’re ready to build momentum with Evergreen Homes by offering a new standard of living together. We’re excited to see this happen in The Arbors of McLean community and in the opportunities this brings us moving forward.”

For builders and developers worldwide, *smart home* is becoming the standard offering in order to stand out in the market. With Loxone, this means a complete ecosystem simply knows how to interact from component to component and respond to individual needs of residents, without collecting data to The Cloud. It is installed quickly and easily with free auto configuration tools in Loxone Config for Loxone Partners. In the newest community by Evergreene Homes, the kitchen is where you’ll find [Loxone lighting controls and fixtures](#) as a Standard Package to each home.

“We’re very excited to partner with Loxone,” exclaims Rob Cappellini, President at Evergreene Homes, “and bring true automation into the newest community in McLean, VA. By offering Loxone as part of our standard, we are able to remain forward-thinking with the possibility for expansion with other systems. This opportunity introduces innovative lighting control that responds to the individual needs of our customers.”

With both Loxone lights and third-party fixtures, they can be controlled to meet a wide range of needs and influence well-being – especially with tunable white lighting effect and constant brightness controller. Combine different light sources with varying light intensities and colors to create unique lighting moods. Each light can be addressed independently for the highest level of control and creativity. Remotely control and personalize your smart home in the Loxone App on your smartphone or tablet.

Additional Master Package can be added on for the highest level of comfort and energy efficiency throughout the home. This includes automated environments in the master suite, bath and closet.

###

About Loxone: Create Automation

Founded in 2009, Loxone is redefining smart living with its green Miniserver to **Create Automation** in smart homes, commercial properties and special applications. There are 120,000+ Loxone projects in 100+ countries implemented by 10,000+ trusted Loxone Partners. With our US headquarters near Philadelphia, the focus remains on improving customers' lifestyles. Loxone takes care of 50,000 tasks in a building per year related to comfort, security and energy efficiency.
